DETAILED ACTION

Claim Rejections - 35 USC § 103

- 1) The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 2) Claims 1-11 and 13-21 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hirai et al (6155386) in view of Payne (1756907).

In reference to claims 1, 7 and 15, 17-21, Hirai et al teaches a braking system for a shaft (12) mounted for rotation, the braking system comprising: a brake disc (4) coupled to the shaft for rotation therewith, the disc including a disc face having a disc contact surface (5); a brake plate (3) mounted to be relatively stationary, the brake plate including a plate face positioned substantially parallel and adjacent to the disc face, a spring (6) biasing the plate face against the disc face, a coil (2) that is powered to create a magnetic field to move the brake disc between an engaged and retracted position. Hirai et al lacks the teaching of the plurality of plateaus and recesses on both the brake disc and the brake plate. Please see the rejection of claim 2 below for the specific angle limitation.

Payne teaches a plurality of plateaus, ramps and recesses on engaging surfaces (figures 3-4), which are capable of use in brakes (Col. 1 lines 1-6).

It would have been obvious to one of ordinary skill in the art at the time of the invention to have provided the contacting disc and plate surfaces of Hirai et al with the

Art Unit: 3683

plurality of plateaus and recesses as taught by Payne in order to positively lock the plate to the disc in order to prevent further relative motion.

In reference to claims 2, 4-6, 11, 14, Payne is silent to the angle of the ramps.

Page 3

It would have been obvious to one of ordinary skill in the art at the time of the invention to have provided the ramps of Payne with an angle of 10 degrees relative to the disc face merely because it would have been a design choice based on the materials used and the force desired to be absorbed by the ramps. Further, please note that it would have been obvious to make the ramp angles 10 degrees since it has been held that where the general conditions of a claim are disclosed in the prior art, discovering the optimum or workable ranges involves only routine skill in the art. In re Aller, 105 USPQ 233.

IN reference to claims 3, 10, 12-13 and 16, Payne teaches three plateaus. Please note that applicant does not claim only three plateaus. Further, please note that it would have been obvious to vary the number of plateaus and recesses since it has been held that where the general conditions of a claim are disclosed in the prior art, discovering the optimum or workable ranges involves only routine skill in the art. In re Aller, 105 USPQ 233.

In reference to claims 8-9, Pane teaches an arrangement where the number of plate plateaus equals the number of disc plateaus and the ramps are all the same angle.

Response to Arguments

3) Applicant's arguments filed 7/29/04 have been fully considered but they are not persuasive.

In response to applicant's argument that the examiner's conclusion of obviousness is based upon improper hindsight reasoning, it must be recognized that any judgment on obviousness is in a sense necessarily a reconstruction based upon hindsight reasoning. But so long as it takes into account only knowledge which was within the level of ordinary skill at the time the claimed invention was made, and does not include knowledge gleaned only from the applicant's disclosure, such a reconstruction is proper. See *In re McLaughlin*, 443 F.2d 1392, 170 USPQ 209 (CCPA 1971).

In response to applicant's argument that there is no suggestion to combine the references, the examiner recognizes that obviousness can only be established by combining or modifying the teachings of the prior art to produce the claimed invention where there is some teaching, suggestion, or motivation to do so found either in the references themselves or in the knowledge generally available to one of ordinary skill in the art. See *In re Fine*, 837 F.2d 1071, 5 USPQ2d 1596 (Fed. Cir. 1988)and *In re Jones*, 958 F.2d 347, 21 USPQ2d 1941 (Fed. Cir. 1992). In this case, clutch devices and brake devices are extremely similar, especially in the area of electromagnetic brakes and clutches. Both devices are used in conjunction with friction surfaces to either impart or hinder motion.

4) THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time

policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE

MONTHS from the mailing date of this action. In the event a first reply is filed within

TWO MONTHS of the mailing date of this final action and the advisory action is not

mailed until after the end of the THREE-MONTH shortened statutory period, then the

shortened statutory period will expire on the date the advisory action is mailed, and any

extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

the advisory action. In no event, however, will the statutory period for reply expire later

than SIX MONTHS from the mailing date of this final action.

5) Any inquiry concerning this communication or earlier communications from the

examiner should be directed to Devon C Kramer whose telephone number is 703-305-

0839. The examiner can normally be reached on Mon-Fri 8-4.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Jack Lavinder can be reached on 703-308-3421. The fax phone number for

the organization where this application or proceeding is assigned is 703-872-9306.
